KITSEN K-RING SCAFFOLD

NON WELDING STRUCTURE FOR BETTER STRENGTH AND SAFETY

www.kitsen.com

Kitsen scaffolding

K-Ring Scaffold System is all-round multi-directional aluminum alloy scaffold. This System, which is much more flexible than portal frame scaffold, provides access for most maintenance, cleaning and decoration works especially with complicated structure at great heights.

APPLICATIONS:

It is widely used for the maintenance, repairing and cleaning of

- ✓ Subways and Tunnels
- ✓ Road and Bridge Constructions
- ✓ Airports and Stadiums
- ✓ Petrochemical Construction
- ✓ Complex Buildings

FEATURES & BENEFITS

- **Easy to handle**
The whole system requires no extra tools or loose fittings for its setup and dismantling. An aerial platform of 20m can be easily assembled by two persons within a short time. The whole process is as easy as toy bricks game.
- **Tested Strength and Safety**
With new cold-work technique of in-expand and out-compress, the joints are distributed with 4100-4400 kg. Each deck can take 272kg and the complete tower 900 kg.
- **Versatility**
K-Ring Scaffold makes a great combination of simplicity and flexibility. It can be designed and assembled in many ways to suit different work environments.
- **Long Lifespan**
All aluminium components are anodized with cast interlocks which provides itself a lifespan of 10 years more.
